THE CHALLENGE OF ENERGY EFFICIENCY.
Promoting innovative business models
for small and medium sized enterprises

What is EPC+?

The Energy Performance Contracting Plus project (**EPC+**) fosters cooperation between SMEs to offer high quality energy services. Furthermore the project aims at a standardisation of technical and contractual issues.

What activities will be implemented?

- + Creation of SME Partnerships for Innovative Energy Services (SPINS).
- + Each SPIN will consist of a network of, at least, three SMEs offering jointly tailored EPC services/ contracts.
- + The development of commercial, standardised energy service packages which will target SMEs interested in improving their energy performance.
- + Implementation of pilot projects in each partner country.
- + Development of an international platform to support collaborative networks and innovation.

Spin "SMEs for SMEs"

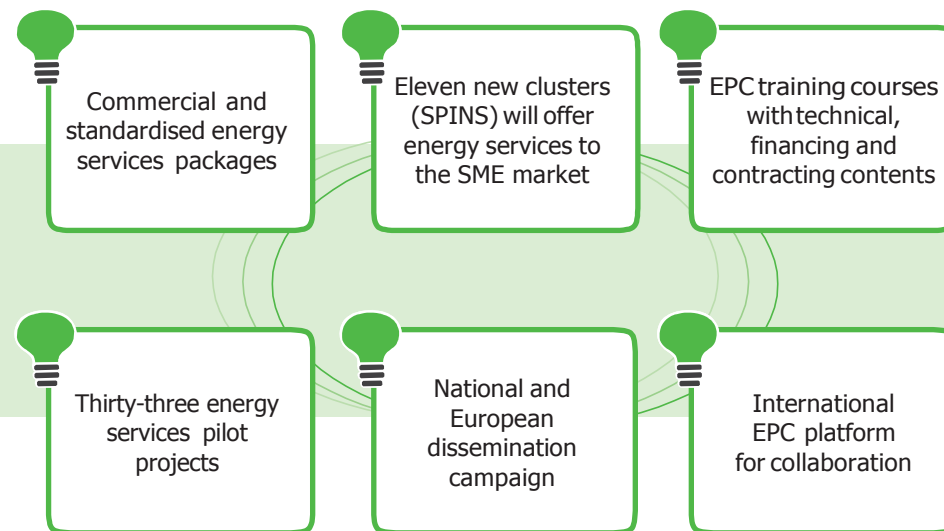

- + The SME Partnership for Innovative Energy Services offers a set of complementary energy services (energy audit, efficient lighting, HVAC, biomass, etc).

Legal Firm
+
Engineering company
+
HVAC company
+
Biomass boiler supplier
+
Smart metering specialist
+
Lighting specialist
+
Energy Consulting

How can you benefit from EPC+?

- ↪ SMEs working together as clusters for better technical and economic management. **A SPIN is a cluster of SMEs that provides high quality EPC services.**
- ↪ Training has become an integral part of the modern business model. **We provide training courses for SPINS.**
- ↪ Organisational and Technical toolbox's and modular contract models for the successful implementation of the energy efficiency measures. **Highly access to EPC guidelines and practical tools.**
- ↪ **The challenge of energy efficiency in SMEs.** Pilot projects to promote market take up of innovative energy solutions and services.
- ↪ The power of information, you can benefit from our **international EPC platform.**
- ↪ **National and European campaigns** will disseminate the successful EPC models.
