We gratefully acknowledge contributions from all EPC+ partners.

This document has been elaborated within the
Energy Performance Contracting Plus (EPC+)
project and is available on the project website.

www.epcplus.org

Deliverable: 7.7

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 649666.

The content here included reflects only the authors' views and the EASME is not responsible for any use that may be made of the information it contains.

The EPC+ project aims at developing and promoting new business models for the implementation of innovative energy efficiency services through cooperation of Small and Medium-sized Enterprises (SMEs). Such innovative energy efficiency services (EES) can be offered in form of energy performance contracts (EPC).

Within the frame of the EPC+ project, each partner country organizes a National Seminar where EPC facilitators, policy makers, energy consultants, ESCOs and potential clients are invited. The project results and pilot projects are presented in the different countries.

The next table includes the information.
